Noah was 600years old when flood started (Gen. 7:6) and Arphaxad born 2 years after the flood when Shem was 100 years old (Gen 11:10). Therefore Japheth would have been 100years old and Shem 98 years old when the flood started. Therefore Noah was 502 years when he had Shem.

At the age 85 he had conquered most of Canaan (Josh. 14:10) but some of the land still required subduing. The allotment of the Land ended when Joshua was about 88 years old (Jash 90:12-15). Acts 13:19-20 "And when he had destroyed seven nations in the land of Chanaan, he divided their land to them by lot. And after that he gave unto them judges about the space of four hundred and fifty years, until Samuel the prophet." (verses to reference Joshua 11:18; 14:7, 10, 11; 23:1; 24:29). "After that" most likely refers to the allotment per the context as Joshua is not mentioned.
From Judges	450	to Samuel	setting up Saul as King	999 BC	2949	Acts 13:20 Until Samuel would include Samuel as after Samuel there were Kings.
Saul's Reigned	40	over Israel		959 BC	2989	Acts 13:21 Samuel old when he made Saul King and then moved to the Kings reigning. The "old" reference in all cases in scripture it is 60+ (1 Sam 8:1), judges ruled from 450years then Kings. Yes there is a discrepancy 1 Sam. 6:1 as it seems incomplete - But this is a source text discussion. The Key is Acts 13:21 is clear - 40 years not 42 years.
David's Reigned	40	over Israel		919 BC	3029	2 Sam. 5:4
Solomon's Reigned	40	over Israel	then Israel split	879 BC	3069	1 Kings 11:42 There seems to be a discrepancy in understanding with 1 Kings 6:1, not the scripture. 480 from leaving Egypt to 4th year of Solomon, where this time line is about 585years. But this is in reference to when Israel was a nation (alotment) and under its own rule not ruled by others. Thus 585 years minus wilderness (41), Joshua conquer (10), and (56) years based on Judges 3:8 (8Y) - Israel served Chushanrishathaim eight years. Judges 3:14 (18Y) - So the children of Israel served Eglon the king of Moab eighteen years. Judges 6:1 - And the children of Israel did evil in the sight of the Lord: and the Lord delivered them into the hand of Midian seven years (7Y). Judges 9:22 - When Abimelech had reigned three years over Israel (3Y). Judges 13:1 And the children of Israel did evil again in the sight of the Lord; and the Lord delivered them into the hand of the Philistines forty years (40Y). Judges 15:20 - And he judged Israel in the days of the Philistines twenty years (therefore add 20years back).

Side Note: There is no 0 BC therefore 1 year removed from the Gregorian calendar.

War of Desolation	-7	Before Yeshua's	1000 year reign	AD 2046	5993	Dan. 9:26-27 The completion of Daniel 70th week - 7 years. 1st Rapture takes place just before the start.

Only Variable: Estimated to be ~10 years, however in the book of Jasher it is 6 years.

BACKGROUND

The 6,000th year is when Yeshua starts to reign for 1,000years. Yeshua reigns for 1,000years, which is the earth's Sabbath. There is no coincidence Yeshua will be reigning for 1,000years (Rev. 20:4) - this is the earth's Sabbath. In Addition, when work with the timeline one needs to start with the death and resurrection of Christ and work back as per the chart.

Is there any doubt on the timeline - rapture happens ~2047AD and the 6000year starts at 2054AD?

1) Depends if the judges were just after the allotment of the land or sometime later.

2) Another watch out is - did someone over the last 2,000years add or remove years from the solar calendar that we don't know about? If years were removed then it would be earlier, if added then it would be later.

Side Note (for those who like details) - The Jewish Calendar is wrong, but tradition has kept it going all these years - the Jewish calendar is out by 180 years. The Jewish calendar we have today was devised in the 2nd Century--- as mentioned, missing 180 years---- they didn't use Daniel's 69 weeks neither did they use the lineage as it was destroyed in 70AD.

Are the Biblical years the same as the Solar Year/Gregorian Calendar (365 - plus leap years)? In other words could the years from 31 AD until today be different than the Biblical year as the Biblical Year up to Christ's resurrection is correct? Today we have 365.25 days/year and in Genesis, it states that there were 150 days over 5 months, therefore it's an average of 30 days per month - however it doesn't mean all the months would be the same. If we used the Book of Enoch (in the dead sea scrolls) - there is a statement of 2912 days in 8 years. This means there are 364 days per year (biblical year). In the book of Jubilee, there is also a statement regarding 364 days per year. Today we have 365.25 days for a solar calendar because of Sin as the Book of Jubilees points out - in the book of Revelation we see this play out during the 7 year world trib.

I believe God would use the Solar Calendar to determine years as First fruit and Feast of weeks cannot be in winter. If they used the 364 days per year then over time it would be in the winter. However for the sake of argument, if we used 364 days per year from 31 AD until 2022 = $1991 \times 365.25 \text{ days} / 364 \text{ days} = 1997.8$ therefore it is an 7 additional years (2029 today vs 2022). This means that it would be 7 years sooner than expected. Fyi - The difference between the Julian and Gregorian Calendar is only 13 days - a non factor.
